Protection of first aiders

No action shall be taken involving any personal risk or without suitable training.

See Section 11 for more detailed information on health and symptoms.

5. FIRE FIGHTING MEASURES

Suitable extinguishing media:

Use water only in flooding quantities. Do NOT use chemical extinguisher or foam or attempt to smother the fire with steam or sand.

Special exposure hazards:

Fire-fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear.

Hazardous thermal decomposition products:

These products are nitrogen oxides (NO, NO₂ etc.).

Remark Explosibility:

The product itself is not combustible but it can support combustion, even in absence of air. On heating it melts and further heating can cause decomposition, releasing toxic fumes containing nitrogen oxides and ammonia.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions:

Use suitable protective equipment (section 8). Follow all fire-fighting procedures (section 5). Do not touch or walk through spilt material.

Environmental precautions:

Avoid contact of spilt material with soil and prevent runoff entering surface waterways.

Cleaning method:

Use mechanical handling equipment.

7. Handling and Storage

Handling:

Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame).

Storage

Store and use away from heat, sparks, open flame, or any other ignition source. Avoid contact with combustible materials. Prevent moisture pick-up in handling and storage.

8. Exposure controls/ Personal protection

Respiratory protection:

Recommended: If dust is generated and ventilation is inadequate, use respirator that will protect against dust/mist.
